### Response to Arguments

1. Applicant's arguments, see "RESPONSE TO OFFICE ACTION", filed 02/21/2006, with respect to claims 17 - 22 have been fully considered (Noted that claims 1 – 16 were cancelled by applicant). Upon further review of the claims, the examiner noted that there is a plurality of distinct inventions claimed by the applicant.

Therefore, a restriction and election of species is required.

#### Election/Restrictions

- 2. This application contains claims directed to the following patentably distinct species:
  - a) Figures 1 & 2 pertain to the preferred embodiment of the invention.
  - b) Figure 3 pertains to an alternative embodiment of the invention.
  - c) Figure 4 pertains to another alternate embodiment of the invention.

Art Unit: 3663

d) Figure 5 pertains to yet another alternate embodiment of the invention.

Page 3

The species are independent or distinct because they have mutually exclusive characteristics.

- 3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 17 is generic. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
  Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
- 4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the

Art Unit: 3663

claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species

Are not patentably distinct, applicant should submit evidence or identify

Such evidence now of record showing the inventions or species to be

Obvious variants or clearly admit on the record that this is the case. In

Either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35

U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
